Fixed bollard, same design as VIGILANT 500/I - RANGER 500/I, powder coating steel or AISI 316 electropolished stainless steel finish.

- Fast and easy to install thanks to the foundation box that can be assembled on site without welding
- Same design as automatic bollards VIGILANT / HYDRA and semi-automatic RANGER
- For very large passages it is possible to combine automatic / semi-automatic and fixed bollards, obtaining an optimal aesthetic result, sensibly reducing the cost of the system

Fixed bollards with led lights have got 12 high visibility red lights, with 5 different flashing modes selectable via dip-switch. Must be powered at 24Vdc.
